

Annex B M2M Certification Applicability (Normative)

This Annex identifies the status for compliance declarations of all M2M specifications and associated processes dependencies (active, planned, expired or deprecated) including:

Security requirements,

Functional requirements, including means of test.

Currently recognised exemptions from compliance.

M2M Vendors and service providers/hosts are invited to use this table as reference when planning product compliance.

This following table identifies all requirements and dependencies for M2M Compliance, including the current valid specification versions for declarations. It is recommended to review the dates in this table when planning an SGP.16 product compliance.

Table B.1 M2M Certification Applicability

	Reference	Version	Product Applicability	Status for compliance	Active from	Expiry Date	Note
GSMA PRDs	M2M Early Adopter Process	~	All	Expired	April 2018	2019-07-24	
	GSMA PRD SGP.11 Remote Provisioning Architecture for Embedded UICC Test Specification	2.0	All	Expired	2015-11-02	2018-07-31	
		3.1	All	Expired	2016-05-31	2018-07-31	
		3.2	All	Expired	2017-06-27	2018-07-31	
		3.3 and later	All	Active	2018-07-31		

		4.0	All	Expired	2019-05-20	2020-06-12	
		4.2.1	All	Active	2020-10-13		
	GSMA PRD SGP.02 Remote Provisioning Architecture for Embedded UICC Technical Specification	2.1	All	Expired	2015-11-02	2019-07-24	
		3.1	All	Deprecated	2016-05-27	2021-03-31	
		3.2	All	Active	2017-06-27	-	
		4.0	All	Expired	2019-02-25	2020-05-14	
		4.1	All	Active	2020-06-05		
		4.2	All	Active	2020-07-07		
		4.2.1	All	Active	2021-11-26		
		4.3	All	Active	2023-01-25		
	GSMA PRD SGP.01 Embedded SIM Remote Provisioning Architecture	1.1	All	Active	2014-01-30		
		4.0	All	Expired	2019-02-25	2020-05-14	
		4.1	All	Active	2020-06-05		

		4.2	All	Active	2020-07-07		
		4.3	All	Active	2022-11-17		
Security Compliance requirements	BSI-CC-PP-0084-2014 Security IC Platform Protection Profile with Augmentation Packages Certification (PP-0084).	1.0	eUICC	Active	2017-10-16		
	BSI-CC-PP-0035 - 2007 Security IC Protection Profile (PP-0035)	1.0	eUICC	Active	2007-06-15		
	GSMA PRD SGP.05 Embedded UICC Protection Profile	1.1	eUICC	Active	2015-08-15		BSI-CC-PP-0089-2014
		4.0	eUICC	Expired	2022-10-07	2023-03-10	
		4.1	eUICC	Active	2023-03-10		
	SGP.16 Annex A.2 section A.2.5.2(b), option 2: Interim methodology – implementation focused security evaluation		eUICC	Active	2019-07-24	Existing product in the field: no expiration if used for the initial security evaluation	See Table B.2

	GSMA PRD SGP.06 eUICC Security Assurance Principles	1.0	eUICC	Expired			
		1.1		Active	2023-07-05		
		2.0		Expired			
		2.1		Active	2024-03-23		
	GSMA PRD SGP.07 eUICC Security Assurance Methodology	1.0	eUICC	Expired			
		1.1		Active	2023-07-05		
		2.0		Expired			
		2.1		Active	2024-03-23		
	GSMA PRD FS.04 SAS for UICC production	Refer to GSMA.com/SAS	eUICC	Active	2017-03-31		
	GSMA PRD FS.08 SAS for SM roles	Refer to GSMA.com/SAS	SM-DP & SM-SR	Active	2017-03-31		
	GSMA PRD SGP.08 Security Evaluation of Integrated eUICC based on PP-0084	1.0	Integrated eUICC	Expired			
		1.1	Integrated eUICC	Expired			
		1.2	Integrated eUICC	Expired			
		1.2.1	Integrated eUICC	Active	2024-02-06	2026-02-06	
		1.3	Integrated eUICC	Active	2024-06-04		
	GSMA PRD SGP.18 Security Evaluation of Integrated eUICC based on PP-0117	1.0	Integrated eUICC	Expired			
		1.0.1	Integrated eUICC	Active	2024-02-06	2026-02-06	

		1.1	Integrated eUICC	Active	2024-06-04		
Functional Compliance requirements	GlobalPlatform test suite						
	GP Test Suites: eUICC M2M Compliance Test Suite	Refer to GP for applicable version(s)	eUICC	Active	2018-07-25		
	eUICC M2M - SIMalliance Interoperable Profile Test Suite						
	Vendor specified Functional test	n.a	SM-DP & SM-SR	Active	SGP.16v1.5		
	Third Party Test Tool	n.a	SM-DP & SM-SR	Active	SGP.16v1.5		
Permitted Exceptions	Permitted Exceptions agreed for SGP.16 declarations	SGP.01 V1.1 requirement PRO12 does not apply in the case where activation of emergency profiles for emergency calling is required by regulation.			2019-04-04		

Table B.2 Product Type

Product Types	Description	Security Assurance Scheme Allowed	Re-Certification Trigger
Existing product in the field	An eSIM product that is produced and ready to be inserted in a M2M device or	Throughout the life cycle of an Existing product in the field:	Changes accepted as an update of the Existing product in the field (update of declaration required) constituting a re-certification:

is inserted in a device which is being used by an end customer or which is in the supply chain from the factory of the device OEM to a store	- Interim methodology can be used, if it was used originally, assuming updates do not change the initial scope of the product. - eSA scheme whether it was used originally, or not. - SOG-IS CC scheme whether it was used originally, or not. - Certification methodology can be switched at the discretion of the EUM throughout the life cycle of the Existing product in the field.	Updates for eSIM functional and/or eSIM security issues within the initial scope deployed using the eUICC OS Update as defined in SGP.02 (see statement below) and as referenced in SGP.16 Section 3.5. <i>SGP.02: 'An eUICC should support a secure mechanism to allow the eUICC OS Update when the eUICC is in the field. Such mechanism allows the eUICC Manufacturer to correct errors in existing features on the eUICC'.</i>

Table B.3 : Status for Compliance

Status for Compliance	Description
Active:	Specification or reference that is currently valid for SGP.16 declarations. Where multiple versions of the same specification or reference are active, the certifier shall identify which version has been used.
Planned:	Specification or reference that is under development.
Expired:	Specification or reference that is no longer valid for SGP.16 declarations.
Deprecated:	Specification or reference for which an expiry date has been stated, and will no longer be recognized for GSMA eSIM compliance after the expiry date.
Permitted:	Permitted as an alternative to a mandatory requirement until the indicated expiry date.
Active from:	The start date from when a specification or reference can be used for SGP.16 declaration.
Expiry date:	The last date on which an SGP.16 declaration can reference the specification or reference. Declarations using an expired specification or reference will not be accepted.
